ATMGurus Expansion and Relocation

Long Beach, MS – For Immediate Release:

For over 30 years, Triton Systems has been a pioneer in manufacturing retail ATM machines in the United States and shipping them worldwide. With partners in 24 countries and an installed base of over 200,000 ATMs, Triton has been proud to call the Mississippi Gulf Coast home since 1979.

Since its launch in September of 2009, ATMGurus has experienced explosive growth as an independent supplier of multi-brand parts, repair and training business based in Memphis, TN. As ATMGurus has flourished, expanding into ATM Trade-In and ATM Refurbishment programs, and the support of Triton's VersaSafe Division, they've simply outgrown their current 30,000 square foot facility. It has been necessary for some time to utilize temporary storage space for parts, and board repair overflow already necessitated transition to the Long Beach, MS office earlier this year. Additionally, the space required to refurbish the number ATMs processed through the Fair Trade program is considerable.

Expansion and relocation of ATMGurus operations to an 88,000 square foot facility in Long Beach, MS will result in the closure of the parts, repair, and training center located in Bartlett, TN. In order to ensure a seamless transition for customers, Triton and ATMGurus will be gradually relocating the parts, repair, and training facilities to Long Beach, MS between now and year-end.

Daryl Cornell, Chief Executive Officer, said, "The success of ATMGurus in providing our customers with a single source of multi-brand parts, repair and training services has exceeded our every expectation. The expansion and relocation of ATMGurus to Long Beach represents the next stage of development for ATMGurus as we increase our service levels in all areas."

As a result of the move, Triton's Long Beach facility and staff will be expanded, improving efficiencies, providing room for growth and increasing customer service levels.

ABOUT TRITON — With over 200,000 installations in over 24 countries worldwide, Triton has been a trusted leader in ATM affordability and service for 30 years. Triton's full-line of ATMs are designed and assembled in the USA at our state-of-the-art manufacturing facility in Long Beach, Mississippi. Powered by Triton Dynamic Language (TDL), our ATMs communicate with the host via a protocol widely accepted as the de facto industry standard.
