

Reduce, Reuse...

Refurbish!

Going green saves you some serious green!

- Instead of discarding outdated ATMs that require enhancement to meet compliance mandates like **PCI, EMV** or **ADA**, upgrade them with kits available at atmgurus.com.
- Trade in old parts for credit you can spend on anything you need in our online store. You can choose to go yet even greener by using the credits to get great deals on our refurbished parts.
- Send us your aging ATMs and we'll upgrade and completely refurbish them so that they are like new and fully compliant with all current mandates when we return them to you.
- Trade in ATMs of any brand. Use the credit you get on your next purchase. We refurbish the things you send in to give them new life so they don't wind up in a land fill.
