

Triton Pioneers Key Management Loading

New Technology Cuts Maintenance Time & Expenses for Off-Premise ATM Operators

LONG BEACH, MS — Off-premise ATM leader Triton announces a new Triton Key Management (TKM) solution, which allows distributors to save money by loading keys remotely. Triton, the first ATM manufacturer to bring this cost-savings solution and security feature to the off-premise space, began deploying TKN in the United Kingdom in March. Triton's TKM solution will be Available in Canada and the United States this summer.

“Until recently ATM deployers were required to have two technicians enter the keys into a keypad and send it out to the ATM site, or have two people visit the site so that each one entered only one half of the master key,” said Bob Douglas, Triton Director of Engineering. “Now rather than having to pay two people to manually entering keys, Triton's Key Management solution uses cryptography to allow distributors to remotely load keys directly from the host to the ATM across a public network.”

“This allows ATM owners especially those with large ATM fleets or those that operate in markets like the United Kingdom, which mandates the use of TKM and requires that master keys be changed every year, to save a considerable amount of money while improving security and improving uptime,” said Douglas.

Merchants and cardholders also benefit from Triton's TKM solution. By eliminating the human element from the key loading process, security is improved. And, merchants are better able to serve their customers with improved ATM uptime since keys can be changed at anytime remotely.

Keypads supporting TKM are an option on most Triton model ATMs.

Stop by Triton's booth during the ATMIA Canada show at the Marriott Toronto Airport to learn more about the many benefits of TKM.

ABOUT TRITON — With nearly 200,000 installations in over 24 countries worldwide, Triton has been a trusted leader in ATM affordability and service for 30 years. Triton's full-line of ATMs are designed and assembled in the USA at our state-of-the-art manufacturing facility in Long Beach, Mississippi. In addition, Triton offers world-class parts, service and training from our Global Service Center in Memphis, Tennessee.
